

Iván Rodríguez

FULLSTACK DEVELOPER
MERN Stack

ABOUT ME

Self taught fullstack developer. I've been working as store manager for the last five years, falling in love with data analysis and business managing tools. I decided to combine it with my other passion: programming and problem solving. Started to study fullstack web development in 2020.

Love to feel challenged and I'm continuously trying to improve my skills. Looking for my first fulltime job as a developer.
